To Re-Image Scan Controller:

- Use The Scan controller Utility to back up the scanner XML files.
- Open the Scan Controller box and remove the SDCard.
- Using 3rd Party software such as "Win32 Disk Imager"
  - Place SD card in PC Holder and write "controller-image-3.4-xxx.img"
- Insert back into scan controller, reassemble being carfull to make sure all cables are plugged in, and apply power.
- First boot will unload and uncompress files. Wait about 1/2 hour until scanner appears with Utility.
- Rename to original name if needed. System will reboot after a few minutes.
- Re-install backed up xml files using Scan Controller Utility
